

# Features and Benefits:

Magic-0 by ProMelt is a premium liquid de-icer that is economical and delivers superior performance in colder environments with a eutectic point of approximately -49F.

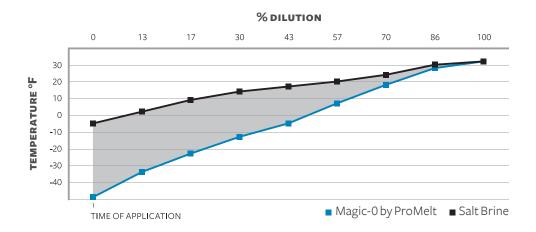

- Salt pretreated or pre-wetted with Magic-0 by ProMelt works at lower temperatures than traditional dry salt.
- Magic-0 by ProMelt reduces bounce and scatter thereby reducing salt application rates which saves time, labor, fuel and materials.
- Meets the stringent requirements of the PNS (Pacific Northwest Snowfighters) for corrosion, toxicity and performance.
- Magic-0 by ProMelt can also be used as an enhancer to salt brines to reduce corrosion, lower freeze points and increase working time.
- Strong residual effect provides lasting performance and reduces chloride brine runoff.

## Comparative Effective Temperatures During Dilution

# **Metal Corrosion Tendency**

De-Icing Fluid	PNS Relative Corrosion Rate
Distilled Water	0
Magic-0 by ProMelt	11.9
Magnesium Chloride	80
Rock Salt (NaCl)	100
Calcium Chloride 30%	121

**Disclaimer:** Application rates are just guidelines. The end user is recommended to adjust application rates based on weather conditions, level of service goals and experience. The guidelines  $presented\ are\ made\ without\ guarantee, warranty\ or\ responsibility$ of any kind on our part.

# Typical Product Application Rates

Magic-0 by ProMelt is specifically designed for anti-icing, direct application de-icing, frost prevention and prewetting of solids. Typical liquid application guidelines are:

#### **Anti-Icing**

Application rates of 16-29 gallons per lane mile are typical. Up to 38 gallons per lane mile should be considered the maximum in any anti-icing situation.

### **Direct Liquid Application De-Icing**

Application rates of 38 - 42 gallons per lane mile.

### **Frost Prevention**

Application rates of 8 – 17 gallons per lane mile are standard. These rates can vary depending on storm conditions and service level goals.

### **Pre-wetting**

Application rates of 5-15 gallons per ton of substrate, depending upon the solid used and the performance objective.
